Business Intelligence & Analytics Management

eps.STRADA-BIA: Monitor & benchmark your organization's pulse FASTER and EASIER ◉

eps.STRADA

**One Enterprise, Many Capabilities**

A blueprint designed and developed to help parking operators get the most out of their organization's critical resources.

eps.STRADA is a fully-integrated enterprise platform that is the perfect fit for parking operators who seek to maximize efficiency and innovation while cutting-down on costs.

SaaS Architecture

With its SaaS architecture, the eps.STRADA enterprise will put your business on the path to profitability.
Integrity Controls

Hosted within an impenetrable, ISO and PCI DSS certified data center, the eps.STRADA enterprise employs sophisticated user-role and system-based security principles, while achieving annual SAS70 Type II audits.

eps.STRADA-BIA

A Parking Industry Insight & Benchmarking BI System

TORViC eps develops solutions that consider the full 360-degrees of parking management. Parking operators turn to TORViC eps to realize efficiencies, enhance quality and scope of their services and safely park more people with less cost.

As an exclusive Parking Industry data aggregator and benchmarking BI system, the eps.STRADA-BIA solution was designed for parking operators to make more informed decisions with timely, data-driven answers to their business questions. The eps.STRADA-BIA solution lets parking operators transform their business data into attractive and easy-to-understand dashboards and reports for greater insights to enhance cost-efficiency and productivity, directly benchmark against nation's and global competitors, forecast business opportunities, monitor trends and discover anomalies and optimize revenue-generating strategies.

Why eps.STRADA-BIA?

The eps.STRADA-BIA solution makes BI faster, easier, and more user-friendly. Engineered for enterprise performance and scale, it also serves the rapidly changing business needs of smaller parking operators.

With its open architecture and systematic updates, the eps.STRADA-BIA solution does away with the hidden system maintenance and support costs and drawn-out implementations of traditional CRM systems.

Key Capabilities

The eps.STRADA-BIA solution's unique and powerful capabilities deliver a 360-degree view of all business operations and parking customer insight, and include

- Intuitive data visualization, utilizing latest gauges and charts
- Mobile and desktop real-time, role-based dashboards and widgets
- National and global parking data aggregation and benchmarking
- Logical alerting and messaging
- Universal collaboration
